

Accepted Paper List of UMC-08

Implement Individual Web-based Learning environment
The similarity computing of documents based on VSM
An Effective Technique of Wavelet Analysis for Small Angle Light Scattering Signal Processing
A novel evaluation method basing on support vector machines
A novel hybrid model for information processing basing on rough sets and fuzzy SVM
A Heider-theory Based Reputation Framework for WSN
Analytical Model Medium Access Control Multiprotocol Architecture For Mobile Multimedia Networks
Routing Optimized Video Transmission over Wireless Ad Hoc Networks
Design and Implementation of Device with Alterable Functions for Ubiquitous Computing
Optimal Matrix Computing Using Vector Division with Sub-word Parallel
A Web Image Retrieval Re-ranking Scheme with Cross-Modal Association Rules
Smart Fridges with Multimedia Capability for Better Nutrition and Health
Efficient Perfectly Periodic Scheduling for Data Broadcasting
P2P-Based Video Streaming Using Multi-peer Aggregation Technique
Hierarchical Policy Model for Managing Heterogeneous Security Systems
Enhancing RFID Tag Resistance against Cloning Attack
Wireless Systems Integration Through MAC
RBTree: A New And Scalable P2P Model Based On Gossiping
Image Steganographic Method with Variable Embedding Length
A Time-Sensitive Path Selection Algorithm for Connectionless Network
Research of a Channel Estimation Using the Receiving Gain in Smart Antenna System
Ubiquitous Computing in Prospect: a Bibliographic Study
From Knowledge Visualisation Techniques To Trends In Ubiquitous Multimdeia Computing
Service Assignment Problem: Exploiting Group Context Information in Service Discovery for Multi-user Multi-service Ubiquitous Computing Environments
Why Google Cannot Beat Baidu in China Search Engine Market
A Knowledge-based Genetic Algorithm (KGA) for the Global Numerical Optimization
Improving Quality of Clustering using Cellular Automata for Information retrieval
Watermarked Data Hiding for Binary Images by Two Stage Referencing
Mobile Sink to Track Multiple Targets in Wireless Visual Sensor Networks
A new LSB based DigitalWatermarking Scheme with Random Mapping Function
A Certificateless Authenticated Group Key Agreement Protocol providing Perfect forward Secrecy
A Communication Framework supporting Cross-Layer Design for Wireless Networks
A Robotic Interface to a Medication Review Expert System
Pattern Recognition from Segmented Images in Automated Inspection Systems
A Reconfigurable NoC Platform incorporating Real-Time Task Management Technique for H/W-S/W Codesign of Network Protocols
From Centralized to Decentralized Video Streaming Using Multiple Descriptions Coding

We sent notification emails with review comments to authors.

Accepted Paper List of UMC-08

Efficient Modeling for Animating Human Face

Secure Mobile Content Delivery Architecture in Hybrid Network Environment

Feature Extraction for Classification from Images: A Look at the Retina

Video Transcoding in Smart Camera for Ubiquitous Multimedia Environment

A Study on a Mobile Network Service Using Ticket Issuance in the AAA system

A Time Balanced Job Scheduling using Divisibility Property for High Throughput Computing in Hybrid Peer-to-Peer Networks

Security Model of Group Message Transfer using a Trigger

Smart Environment Authentication: Multi-Domain Authentication, Authorization, Security Policy for Pervasive Network
