Table of Contents

A Fault Tolerant, Dynamic and Low Latency BDII Architecture for Grids

Asif Osman, Ashiq Anjum, Naheed Batool, Richard McClatchey

Achieving of Tabu Search Algorithm for Scheduling Technique in Grid Computing Using GridSim Simulation Tool: Multiple Jobs on Limited Resource

Mohd Kamir Yusof, Muhamad Azahar Stapa

Consistency Management of Replicas in Wireless Grid Environment

Ghalem Belalem, Lamia Allal, Cherifa Dad

EAB-Euclidian Algorithm Based Key Computation Protocol for Secure Group Communication in Dynamic Grid Environment

Dr. M. Venkatesulu, Mr. K. Kartheeban

Multiobjectives GA-Based QOS Routing Protocol for Mobile Ad Hoc Network

J. Abdullah

State of the Art and Research Challenges of new services architecture technologies: Virtualization, SOA and Cloud Computing

Asma BEN LETAIFA, Amel HAJI, Maha JEBALIA, Sami TABBANE
Energy Efficient Transmission Error Recovery for Wireless Sensor Networks

Shio Kumar Singh, M P Singh, D K Singh
