Journal Topics

IJSEIA aims to facilitate and support research related to software engineering technology and the applications. The topics covered by IJSEIA include the following:-

Basic Topics:

- Component-Based Software Engineering
- Software Requirements Engineering
- Software Architectures & Design
- Information Engineering
- Mobile/Wireless Computing & Applications
- Communication Systems & Networks
- Visual and Multimedia Computing
- Intelligence
- Economic and Financial Systems
- Software Security
- Modeling with UML
- Reverse Engineering & Reengineering
- Use Cases, Scenarios
- Middleware Design Techniques
- Software Economics & Cost Modeling
- Programming Languages
- Software Tools and Development environments
- Software Policy and Ethics
- Software Process Models
- Parallel and Distributed Computing
- Data Mining, Knowledge Discovery, Artificial Intelligence
- Information Management Systems, MIS
- Software Testing & Analysis
- Software Components and Reuse
- Case Studies
- Object-Oriented Techniques
- Agent Technology
- Project Management and Maintenance
- Embedded and Real-Time Software
- Empirical Software Engineering and Metrics
- Aspect-Orientation and Feature Interaction
- Software Development Methodology
- Software Process Improvement
- Project Management
- Quality Model
