# Table of Contents

IEEE 802.15.6 WBAN Beaconing for Wireless USB Protocol Adaptation  
Kyeong Hur, Won-Sung Sohn, Jae-Kyung Kim and YangSun Lee  

Software Measurement and Software Metrics in Software Quality  
Ming-Chang Lee and To Chang  

Specification and Automated Detection of Code Smells using OCL  
Tae-Woong Kim, Tae-Gong Kim and Jai-Hyun Seu  

On A New High Quality Speech Coder using Non-uniform Sampling and the Rectified Harmonics  
Seongeon Bae and Myungjin Bae  

A Green Model for Sustainable Software Engineering  
Sara S. Mahmoud and Imtiaz Ahmad  

Semi-automated Classification Scheme-based Massive Science and Technology Data Management  
Wongoo Lee, Yunsoo Choi, Myungseok Choi, Suntae Kim, Sanghwan Lee and Minho Lee  

Implementation and Performance Evaluation of the WS-DAIR Interface for AMGA  
Sunil Ahn, Taesang Huh, Geunchul Park, Namgyu Kim and Soonwook Hwang
Verification of Requirements Extraction and Prioritization Based on Goal Oriented Use Case Approach by using Use Case Points 105
So Young Moon and Robert Young Chul Kim

From AADL to Timed Automaton - A Verification Approach 115
Mohamed Elkamel Hamdane, Allaoui Chaoui and Martin Strecker

Cloud-based Home Media System Model: Providing a Novel Media Streaming Service using UPnP Technology in a Home Environment 127
Yun Cui, Myoungjin Kim and Hanku Lee

Deriving Multi-Agent System Behavior 137
Ahmed Harbouche, Mohammed Erradi and Aicha Mokhtari

Smart Museum Based on Regional Unified App 157
Eun Sok Bae, Dong Uk Im and Sung Young Lee

Successive Optimization of Interval Type-2 Fuzzy C-Means Clustering Algorithm-based Fuzzy Inference Systems 167
Keon-Jun Park and Dong-Yoon Lee

Advanced Tagging and Semantic-Annotation Methods for the Semantic-based OpenAPI Retrieval System 177
Seung-Jun Cha and Kyu-Chul Lee

Automatic Selection of Functional Indexes for Object Relational Mapping System 189
Aleksandra Boniewicz, Michał Gawarkiewicz and Piotr Wiśniewski
Vendor or Client: What are the Important Factors for SDO Project Success?

Dong-Hwan Cho and Haeng-Nam Sung

Implementation of Port Logistics Information System using e-Government Standard Framework

Yong-Hae Han, Mok-Ryun Choi, Chang-Seung Ha, Doo-Jin Park, Sung-Chul Byun and Lee-Sang Jung

Power System Topology Modification for Fault Current Reduction Using a Tabu Search Algorithm

Hwachang Song

Regression Testing of Object-Oriented Software: Towards a Hybrid Technique

Pierre-Luc Vincent, Linda Badri and Mourad Badri

Nonlinear Modeling Using Fuzzy Neural Networks Based on Scatter Space

Keon-Jun Park and Dong-Yoon Lee

Necessity of the Introduction of Panel Survey and Its Problem: Focused on Leisure Studies

Young-Min Song and Seung-Il Moon

Lessons for Software Modeling from “Architecture 101” Movie

Kai-On Chow and Tak-Lam Wong
An Improvement Technique for Simulated Annealing and Its Application to Nurse Scheduling Problem 269

Young-Woong Ko, DongHoi Kim, Minyeong Jeong, Wooram Jeon, Saangyong Uhm and Jin Kim

Study on Cellular Iterative Location Algorithm with Uniform Noise 279

An Qin-li, Chen Jian-feng and Yin Zhong-hai

Fast and Low cost $\text{GF}(2^8)$ Multiplier design based on Double Subfield Transformation 285

Hyeong-Keon An

Implementation of a Prototype Personal Live Broadcasting System 295

Jaegeol Yim and Gyeyoung Lee

An Approach for Measuring Quality of Web Service 305

Yan Gong and Lin Huang

Extracting Key Technology Using Advanced Fuzzy Clustering 315

Sunghae Jun and Seung-Joo Lee

Development of Database System for Clinical Management of Patients with Coronary Artery Disease 323

Seong-Ran Lee

A Rough Computing based Performance Evaluation Approach for Educational Institutions 331

Debi Prasanna Acharjya and Debarati Bhattacharjee
Systems Features Analysis (SFA) and Analytic Hierarchy Process (AHP) in Systems Design and Development

Felipe P. Vista IV and Kil To Chong

An Extended UML Metamodel for Efficient Application Design and Development

Gabriele Cestra, Gianluca Liguori and Eliseo Clementini

Towards a Next Generation Distributed Middleware System for Many-Task Computing

Jik-Soo Kim, Sangwan Kim, Seokkyoo Kim, Seoyoung Kim, Seungwoo Rho, Ok-Hwan Byeon and Soonwook Hwang

Concretization of the Structural and Behavioral Models based on model Transformation Paradigm for Heterogeneous Mobile Software

Hyun Seung Son, Woo Yeol Kim and Robert Young Chul Kim

Semi-Parametric Approach for Software Reliability Evaluation Using Mixed Gamma Distributions

Hiroyuki Okamura, Takumi Hirata and Tadashi Dohi

Benefits and Challenges of Social Networks in Kazakhstan

Ha Jin Hwang

Redundant Data Removal Technique for Efficient Big Data Search Processing

Seungwoo Jeon, Bonghee Hong, Joonho Kwon, Yoon-sik Kwak and Seok-il Song
Design of Fuzzy Respective Space-Based Neuro-Fuzzy Networks for Pattern Recognition 437

Keon-Jun Park, and Yong-Kab Kim

Assignment of Starting Offsets for Periodic Activities with Occupation Time Unit 1 and a Restricted Sufficient Condition for Some Practical Cases 445

Kirack Sohn
