

Table of Contents

The Development of the Simulation Modeling System and Modeling Ability Evaluation **1**

Jeng-Fung Hung and Jen-Chin Lin

Using Low-Level Architectural Features for Configuration InfoSec in a General-Purpose Self-Configurable System **17**

Nicholas J. Macias and Peter M. Athanas

The Development of Dynamic Brand Equity Chase Model and Its Application to Digital Industry Based on Scanner Data **29**

Nam Yongsik and Kwak Youngsik

Policy based Agents in Wireless Body Sensor Mesh Networks for Patient Health Monitoring **37**

Kevin Miller and Dr. Suresh Sankaranarayanan

Terrain Mapping and Classification in Outdoor Environments Using Neural Networks **51**

Alberto Yukinobu Hata, Denis Fernando Wolf, Gustavo Pessin, and
Fernando Osório

Application Protocol Design for Collaborative Learning **63**

Joung-Souk Sung
